**READING THE DISPLAY**

The watch reverts to regular timekeeping when the button is pressed after operation.

**DUAL TIME**

Press C.

- **COUNTDOWN ALARM**
  - Hour
  - Second
  - Mode indicator

- **STOPWATCH**
  - Second
  - 1/100th of a sec
  - Mode indicator

**SETTING TIME AND CALENDAR**

1. Press B in regular timekeeping mode.
2. Press B on a time signal to correct seconds.
3. Press C to shift flashing position. The digits to be changed will flash.

**FIVE DAILY ALARMS**

Five daily alarm times can be set independently. The alarm buzzer sounds for 20 seconds at the preset time. To stop the buzzer, press any button.

**SETTING DUAL TIME**

1. Press B in the dual time mode.
2. Each press of A or B corrects flashing digits one by one. Keep pressed for quick correction.
3. Press C to shift flashing position. The digit(s) to be changed will flash.

**COUNTERDOWN ALARM OPERATION**

The countdown can be set from one minute to 24 hours (Display shows 00:00), and times to an accuracy of 2 seconds.

Start/stop operation is possible by pressing the B button and is confirmed by a signal. When the display reaches zero, the buzzer will sound for 10 seconds unless any button is pressed.

---

(Auto-repeat function) The watch, if left unused, will automatically return to regular timekeeping in a few minutes.

*The B button changes 12/24 hour formats.*
STOPWATCH OPERATION
A signal confirms start/stop operation. (Working range) The stopwatch display is limited to 23 hours 59 minutes 59.99 seconds, for longer times reset and started again. Press B to view hour digits.

CARE OF YOUR WATCH
- Battery life is calculated from when the battery is loaded at the factory. At first sign of power fade (no light or dim display), have battery replaced at dealer or Casio distributor.
- The watch will withstand the ingress of water at a static pressure as indicated, i.e. 50 meters, 100 meters or 200 meters, or equivalent to immersion in sea water at the stated depth. However, when performing any underwater activity, the dynamic pressure generated through movement is greater than the static pressure for full details on the limitations of use, please refer to the water resistance chart below:

<table>
<thead>
<tr>
<th>Rank</th>
<th>Case Designation</th>
<th>Splash, rain, etc.</th>
<th>Swimming, care, washing, etc.</th>
<th>Snorkeling, diving, etc.</th>
<th>Scuba diving</th>

<td>No</td>
</tr>
</tbody>
</table>

* This watch is not water-resistant, so be careful not to get it wet.
** Caution—50 meter water resistant models—do not operate push buttons below the surface of the water.
- Your underwater watch has been tested in accordance with the International Organization for Standardization regulations ISO2281 and FTC (USA) "GUIDE FOR THE WATCH INDUSTRY", Guide 5.

SPECIFICATIONS
Accuracy at normal temperature: ± 15 seconds a month
Display capacity:
- Regular timekeeping mode
- Analog: Hour, minute, second
- Digital: (Time) Hour, minute, second, am/pm, month, date

Calendar system: Auto-calendar pre-programmed to the year 2029
- Daily alarm mode
- 5 daily alarms can be set independently.
- Hourly time signal function
- Dual time mode
- Countdown alarm mode

Input range: From 1 minute to 24 hours
Measuring unit: 1 second
Measuring modes: Normal time and time
- Stopwatch mode

Measuring capacity: 23 hours 59 minutes 59.99 seconds
Measuring unit: 1/100th of a second
Measuring modes: Normal time, net time, split time and 1st-2nd place times

BATTERY LIFE: Battery life is calculated from when the battery is loaded at the factory. At first sign of power fade (no light or dim display), have battery replaced at dealer or Casio distributor.

- This watch contains precision electronic components. Never attempt to open the case or remove the back cover.
- A waterproof rubber seal is used to guard against water and dust. As rubber deteriorates with time, the seal should be replaced periodically (every 2—3 years).
- Should water or condensation appear in the watch, immediately have the watch checked. Water can corrode electronic parts inside the case.
- Avoid exposing the watch to temperature extremes.
- Although the watch is designed to withstand impact under normal use, it is advisable to subject it to severe impact, rough usage or drops onto hard surfaces.
- Avoid wearing the hand too tightly. You should be able to insert your finger inside the band.
- Clean the watch and bracelet with a soft cloth, dry or moistened with mild soap. Never use volatile chemicals (such as benzine, thinners, spray cleaners, etc.).
- Gold plated surfaces can be kept in good condition by regular wiping with a soft cloth. Discoloration can be removed with detergent.
- Always store your watch in a dry place.
- Avoid exposing the watch to strong chemicals such as gasoline, cleaning solvent, aerosol spray, adhesive agent, paints, etc. The chemical action caused by such liquids will destroy the seals, case and finish.
- Be careful not to rub off the silk screen process printing on the watch band. (Some models only)

Battery: One lithium battery (type: CR-1616). Approx. 2 years operation on type CR-1616. (Includes the alarm for 20 seconds per day)

NOTE: THERE IS NO WAY unit components can be damaged or malfunction, due to misoperation of buttons. If confusing information appears on the display it means entry sequence was incorrect. Please read the manual and try again.
