**USING THE TELEMEMO FUNCTION**

A maximum of 100 records (comprised of 6 characters and 16 digits) are storable in memory. A password function keeps the entries private. The watch displays the number at one touch.

The telememo function also features two credit card number memories (comprised of up to 13 characters and 29 digits). Storing the credit card number in memory enables credit card calls.

Note that depending on the type of phone utilized or area, difficult may result.

**NORMAL DATA AREA**

- **TIME**
  - Press for a few seconds until the blinking cursor appears.

- **SECRET DATA AREA**
  - Enter password

**DELETING A PASSWORD**

**STEP 1** Press for a few seconds in the TIME mode until NO appears.

**STEP 2** Press for a few seconds (until CLEARN appears) to delete the existing password.

Deleting the password erases all secret data.

The display shows SET.
