General Guide

- You can use the Remote Control functions while in the Timekeeping Mode.

Timekeeping Mode

Signal Emitter

In addition to normal timekeeping, the Timekeeping Mode also provides you with remote control capabilities for your TV or video tape deck.

- The term “TV” and “television” as used in this manual refer to both standard televisions and the cable box of cable TV systems.
- This watch will control only televisions and video tape decks that are equipped with remote control sensors.
- For details on how to set the time and date, see “Time Setting Mode”.

Note

The remote control buttons of the watch are marked according to their functions. In this manual, the buttons are referred to by using their marking in bold characters.

Example: Press POWER to switch on the television.

About the Timekeeping sub-modes

The Timekeeping Mode is actually made up of three sub-modes. Use the (SELECT) button while in the Timekeeping Mode to switch between the sub-modes.

Press A.

Normal Timekeeping Mode

TV Mode

(for television remote control)

Video Mode

(for video tape deck remote control)

About the remote control function

In order to be able to use this watch for remote control of a television or video tape deck, you must first set the appropriate manufacturer code. The manufacturer code tells the watch what signals to use for remote control. The Manufacturer Code Table shows the names of the manufacturer and the code corresponding to each code. For details on how to actually set the manufacturer code, see “To set the manufacturer code”.

Some TV or tape deck models may not work properly with this watch, even though they are made by one of the manufacturers in the Manufacturer Code Table. Also, you may find that you can control a TV or tape deck using a code for a manufacturer that is different from the ones in the table. For details on finding the code you should use, see “How to find the right code”.

Note

- Replacing the battery will cause the remote control data setting (TV/video manufacturer codes) to be altered. Be sure that you make a note of your codes before you have the battery replaced.
- There are some manufacturers with more than one code. Try the various codes available for your equipment to find the one that works best.
- You have to set separate codes for your TV and tape deck, even if they are made by the same manufacturer.
- You might not be able to use this watch to control models that combine a TV and tape deck into a single unit, multi-functional TVs that can be used as computer monitors, or other televisions or tape decks equipped with special functions.

Operation Guide 1138 1173

Troubleshooting Guide
Problem: Remote control functions do not work at all.
Action: Make sure the watch is in the TV Mode when you are trying to control a TV, or in the TV/VCR Mode when you are trying to control a video tape deck. See “About the Timekeeping sub-modes” for details on changing modes. You cannot control any other remote control device (besides a TV or video tape deck) using this watch.

Possible Cause: Wrong manufacturer code.
Action: You must set the correct manufacturer code for the type of TV or video tape deck you are trying to control. See “To set the manufacturer code” (p. 114), or consult your TV or video tape deck manual.

Possible Cause: The path between the signal emitter and TV/video tape deck is obstructed or too long (more than 16 feet/5 meters).
Action: The distance between the watch and TV/video tape deck should be less than 16 feet (5 meters). Also, make sure that the signal emitter is pointing directly at the TV/video tape deck when you are performing a remote control function.

Possible Cause: Use of button on the watch for which the TV/video tape deck does not have a corresponding function.
Action: Some TV or tape deck models may not have functions that correspond to the functions provided on the watch.

Problem: Video deck functions do not work at all.
Action: Try switching the setting (between A Code/B Code or Video 1/Video 2) remote control receiver.

Possible Cause: Your video tape deck might have a dual code (A Code/B Code or Video 1/Video 2) remote control receiver.

Problem: TV/VCR functions do not work at all.
Action: To set the manufacturer code, press A while in the TV Mode and then press the A button on the right side of the watch. See “To set the manufacturer code” (p. 114), or consult your TV or video tape deck manual.

Possible Cause: Incorrectly set manufacturer code.
Action: To set the correct manufacturer code, press A while in the TV Mode and then press the A button on the right side of the watch. See “To set the manufacturer code” (p. 114), or consult your TV or video tape deck manual.

Alarm Mode

To set the alarm time
1. Hold down B while in the Alarm Mode until the hour digits start to flash on the display. The hour digits flash because they are selected.
2. This operation will switch the Daily Alarm on automatically.
3. Press A to change the selection in the following sequence:

Alarm on indicator

To test the alarm
Hold down A while in the Alarm Mode to sound the alarm.

Time Setting Mode

To set the time and date
1. Use B to enter the Time Setting Mode.
2. Press A to change the selection in the following sequence:

Day of week
Date

PM indicator

3. While the seconds digits are selected (flashing), press A to reset the seconds to “00.” If you press A while the seconds count is in the range of 30 to 59, the seconds are reset to “00” and 1 is added to the minutes.
4. While any other digits (besides seconds) are selected (flashing), press A to increase the number. While the day of the week is selected, pressing A advances to the next day. Holding down A changes the current selection at high speed.
5. After you set the time and date, press C to return to the Timekeeping Mode.

Stopwatch Mode

The Stopwatch Mode lets you measure elapsed time, split times, and two finishes. The range of the stopwatch is 23 hours, 59 minutes, 59 seconds.

(a) Elapsed time measurement
(b) Split time measurement
(c) Split time and 1st-2nd place times

To test the alarm
Hold down A while in the Alarm Mode to sound the alarm.

To set the time and date
1. Use B to enter the Time Setting Mode.
2. Press A to change the selection in the following sequence:

Day of week
Date
PM indicator

3. While the seconds digits are selected (flashing), press A to reset the seconds to “00.” If you press A while the seconds count is in the range of 30 to 59, the seconds are reset to “00” and 1 is added to the minutes.
4. While any other digits (besides seconds) are selected (flashing), press A to increase the number. While the day of the week is selected, pressing A advances to the next day. Holding down A changes the current selection at high speed.
5. After you set the time and date, press C to return to the Timekeeping Mode.

The watch does not make any allowance for leap years. Be sure to manually set February 29 (when one occurs) for the appropriate date.

If you do not press any buttons for a few minutes while a selection is flashing, the flashing stops and the watch goes back to the Timekeeping Mode automatically.
